

Best of breed WMS and TMS for a successful Digital Transformation with SAP® Solutions

Chariot Plumbing worked with Linfa System Solutions and THE RIC Group to deploy TBO4 on SAP B1 in the cloud, our loosely coupled WMS and TMS solution. Now proof of delivery, custom label printing, accurate inventory, and intelligent operations helps to provide exceptional customer service and accurate information at their fingertips. This is digital transformation at it's best.

Before: Challenges and Opportunities

- Provide a stable WMS platform fully integrated with SAP Business One, hosted don the current SAP partner cloud infrastructure;
- Flexible web based solution that works from any device;
- Accurate Proof of delivery, able to easily capture signature, up to 30 photos and barcode validation of every item that has been delivered on site;
- Full integration with SAP Business One to avoid double handling;
- Custom label printing on receiving and picking;

Why SAP with Linfa Systems

- SAP provides a strong accounting system.
- Linfa Systems crushed the competition in advanced warehouse and delivery solutions of all the WMS systems we reviewed.
- The implementation team form Linfa Systems and Then RIC Group provided a phenomenal launch and I cannot recommend them enough.

After: Value-Driven Results

- Digital transformation, cut down dramatically on paperwork.
- Proof of Delivery, with digital signature and up to 30 photos;
- Load Truck function;
- Custom Label printing on every stage of the WMS process;
- Improved process and communication between sales and warehouse staff;
- Pick list can be prioritized based on customer needs and visibility of order status in real time;
- Allows customer scalability with SAP Business One;
- Full visibility of inventory levels and stock movements in real time;
- Advanced technology at an effective cost;

“TBO4 helped our business tremendously by providing a fully modern and working WMS system within the SAP platform.”
